

Engineering Internship Programme

About Atlas

Hello and welcome!

Atlas Consolidated Pte Ltd. owns and operates two brands: Hugosave, a B2C consumer finance app, and HugoHub, a B2B Banking as a Service platform. Atlas is Headquartered in Singapore.

Hugosave

Hugosave is a digital banking application and debit card that puts saving first. Our initial market is Singapore, but regional and global expansion is taking place swiftly. Through our product vision of Better Budgeting, Smarter Spending, and Sustainable Saving, we aim to build a financially healthy and thriving community.

HugoHub

HugoHub is a standalone B2B technology platform owned by Atlas Consolidated, which offers a full suite of modular banking services through a single integration. HugoHub comprises 5 key Product Pillars that serve the needs of our clients: 1. Accounts, Wallets & Payments, 2. Card Programmes, 3. Wealth, Savings & Investments, 4. Full Stack BaaS (Banking as a Service) and 5. Bank of API's

Our clients build experiences that are layered above these Product Pillars to provide engaging go-to-market solutions for their end users.

Our licenses - license granted, a regulated company with strong credentials

Atlas Consolidated Pte Ltd satisfies stringent corporate governance, operations, and regulatory integrity requirements to attain licenses from key stakeholders, such as:

- *Monetary Authority of Singapore* - Major Payment Institution license
- *Ministry of Law, Singapore* - Regulated Precious Metals Dealers license

- Visa Inc. - Principal Members Issuing licence

What are we solving with an Internship Programme?

Our most precious capital is both financial and human. We leverage our financial capital to hire, retain, motivate, and ultimately align employees with our collective goals to achieve our long-term success. Success is defined as the north star of our Purpose, Mission, and Vision.

We believe doing an internship with corporates is a great program both for us and the students. It will give them a chance to evaluate us and solve real-world problems.

Potential future employees: You can gain real-world experience through broad exposure and insight into an early-stage FinTech organization, i.e., the drive, pace, chaos, and excitement of being in a young organization. In the process, we get to “test drive” to assess each other accurately as potential employers and entry-level hires, respectively.

Enhanced perspective: Having technical savvy interns adds fresh ideas to the business and unbiased perspectives on the inner workings of Atlas. It gives us a chance to work with go-getters who may not necessarily have a lot of experience but have a lot of energy and are highly motivated. Interns also bring specialized skill sets (augmenting our team skills) that can be further built into transferable skills by hands-on training on our real-time projects that require in-depth work.

Learning and mentoring: Seasoned experts/people (ex-Google, ex-Amazon) with experience get an opportunity to hand-pick, develop, and grow their own future leads by offering challenging but rewarding short projects that give the intern a chance to learn a lot from great leaders and help us further build a product that impacts our users' financial well-being.

What does an Engineering Intern mean to us?

Atlas is looking for rockstar interns with experience in software design, coding, and debugging. The intern will gain exciting real-world software engineering experience at a thriving company. This role will be based out of our Development Center in Hyderabad.

There are certain functions and capabilities we believe are essential to the role:

We're looking for someone,

- Who wants to learn and teach others to make Atlas better each and every day.
- Who believes documentation and design are as important as code.
- Who is passionate about participating in all phases of the software development lifecycle.
- Who understands why a piece of code/design/framework exists and always strives to create simple and elegant solutions by building high quality, readable, and easily maintainable code, and APIs.

- Who understands building consumer products is about making things easier, clearer, and more useful for people.
- Who believes in our purpose, mission, vision, and values.

Technical Requirements

Must-have skills for this role:

- Well-versed in programming.
- Good understanding of data structures and algorithms.

What we would consider as added value

Skills and capabilities we believe are highly relevant include:

- Our current stack consists of Java, Python, and ReactNative. Experience in any of these programming languages will be an added advantage.
- Comfortable working with existing code and also writing code from scratch.
- Superior time management with excellent collaboration skills.
- Fluent English speaker and writer.

Atlas values being Responsible, Open, and Collaborative.

You should be passionate about what Atlas stands for:

- Honest, truthful and open communication at all times with the team members.
- We are responsible to our customers, community, and team to help shape a more open, collaborative approach to wealth. This is how Atlas hopes to make a difference and help us build better communities.
- Shared responsibility is not only part of our approach to wealth but also a key part of working together. This shared responsibility allows for openness and candor between us as a team and in our customer relationship.
- Good ideas can come from anywhere, so an open and collaborative dialogue between the Atlas community (customers, team, and stakeholders alike) helps us all get the best from each other and makes a difference. Everyone is welcome to apply.

Stipend: INR 35,000 / Monthly

Internship Period: 6 months
