## EDUCATION

---

### NATIONAL INSTITUTE OF TECHNOLOGY PUDUCHERRY

Degree in Bachelor of Technology (B.Tech) in Department of electrical and electronics engineering with Minor in Artificial Intelligence & Internet of Things 2021 - Present

## EXPERIENCE

---

### **Keprevos enterprise business solutions pvt ltd. | Web developer Intern** - - JUNE 2023

- Applied newfound backend skills to lead the development of a Learning Management System (LMS) akin to Google Classroom.
- Utilized a comprehensive tech stack comprising HTML, CSS, JavaScript, Symfony (PHP framework), and MySQL to architect and implement the LMS, catering to the diverse needs of educators and learners alike.
- Demonstrated a keen understanding of software architecture principles and database management techniques to ensure optimal performance and scalability of the LMS platform

### **Oil and Natural Gas Corporation Ltd | Web developer Intern** - - MARCH 2024

- Created a robust internship registration portal for ONGC Cauvery asset, enhancing the application and management process for interns.
- Worked with a team of 5 members, coordinating tasks and meeting project deadlines, using Angular for the frontend and Express.js with MongoDB for the backend.
- This internship portal allows students from various Institutes in and around ONGC Cauvery Asset region to apply for various internships provided by ONGC Cauvery Asset.

## SKILLS

---

|                        |                                        |
|------------------------|----------------------------------------|
| Programming Languages: | C++, Python, HTML, CSS, Javascript     |
| Libraries/Frameworks:  | Flask, Angular, ExpressJs              |
| Tools / Platforms:     | VScode, Jupyter Notebook, Google Colab |
| Databases:             | MySQL, MongoDB                         |

## PROJECTS / OPEN-SOURCE

---

### **PREDICTING RESISTANCE OF RESISTORS IN REAL TIME**

- Imported resistor images Data-set which contains resistor images of varies resistance values captured in different angles and with different lightings.
- Overcame the difficulty of labelling the images of resistors with their respective resistance values by grouping up the images of respective resistors and stored in folders having their respective resistance values.
- Through Machine Learning algorithms and techniques created a model which predicts the resistor's closest resistance values.
- Finally deployed the model to a Web Application using FLASK . It takes the resistor image from the user and predicts it's resistance value.Thus helps in reducing the confusions in finding out the necessary resistors in Laboratories.

### **ABUSIVE LANGUAGE(TAMIL) DETECTION**

- Worked on a dataset which contains Text, Audio and Video files in tamil language.
- Used Pipeline method in Python to use different algorithms together.
- Identified that for the same text dataset , the Accuracy , Precision, Recall and F1 Score varies for different algorithms.
- While using the Stochastic Gradient Descent algorithm along with TFIDF Vectorizer and Countvectorizer in a pipeline, the accuracy increased drastically for the same text data-set.

## HONORS & AWARDS

---

- Participated in STATE ATHLETICS CHAMPIONSHIP thrice and selected for finals twice.
- Participated in ALL INDIA INTER NIT FOOTBALL TOURNAMENT twice and qualified to semi-finals once.
- Participated in ALL INDIA INTER NIT ATHLEICS TOURNAMENT and selected for finals in 100m dash
- Vice Captain, EEE Department Sports Team Led and inspired a dynamic team, fostering sportsmanship and achieved overall championship in inter-college competitions.
