Profile

Dedicated Electrical and Electronics Engineering student with a minor in Artificial Intelligence and Machine Learning at NIT Puducherry, graduating in 2025. Skilled in leveraging interdisciplinary education to merge engineering principles with advanced AI and ML technologies. Proficient in Python, C, C++, and Go, with strong competencies in data analysis, machine learning, web development, and algorithm design. Experienced in building dynamic web applications using the MEAN stack and backend frameworks like Flask, Laravel, and Symfony. Passionate about applying knowledge to real-world challenges and eager to collaborate on innovative projects.

Education

2021/12 – present
Karaikal,
Puducherry, India

Bachelor of Technology(B.Tech) in Department of Electrical & Electronics with minor in Artificial Intelligence and Machine Learning
National Institute of Technology Puducherry
CGPA : 8.25

2020/06 – 2021/04
Puducherry, India

Class 12
St Patrick Matriculation Higher Secondary School
Department of Computer Science, Percentage:94.5%

2018/07 – 2019/04
Puducherry, India

Class 10
St Patrick Matriculation Higher Secondary School
Percentage: 93.4%

Professional Experience

2024/05 – present
Puducherry, India

Freelance Developer
KEPREVOS Enterprise Business Solutions Pvt Ltd

- Developed an interactive WhatsApp bot for financial advisors in Singapore to enhance their client engagement.
- The bot assists in promoting financial products, gathering leads, and scheduling appointments through Microsoft Teams.
- Working on projects involving AI, applying advanced techniques to create intelligent solutions tailored to client needs.

2023/10 – present
Karaikal,
Puducherry, India

Web Team Head
National Institute of Technology Puducherry

- Played an integral role in the development of the college website using Angular, a modern JavaScript framework.
- Spearheaded the implementation of innovative features, including page translation, custom search engine, and theme change, enhancing user experience and accessibility.

2024/01 – 2024/04
Hyderabad, India

Data Science Intern
Innomatics Research Labs

- Led EDA using Python to extract insights and managed ML projects with MlFlow, optimizing the ML lifecycle.
- Integrated ML models into applications with Flask and deployed them on AWS EC2 for scalability.
- Contributed to AI projects with OpenAI API, Gemini Pro API, and Langchain framework, staying updated on advancements in Large Language Models and Generative AI.

Skills

Programming Languages:

C, C++, Python, Javascript, Typescript

Libraries/Frameworks

Angular, ExpressJs, LangChain, Bootstrap, Flask

Tools/Platforms:

Jupyter Notebook, Vs Code, Google Colab, MLFlow, AWS

Databases:

MySQL, Sqlite, MongoDB

Projects

2023/10 – 2024/01

ONGC Internship Registration Portal

Angular, Express Js, MongoDB, Git

- Developed a comprehensive internship registration portal for ONGC Cauvery asset, streamlining the application and management process for interns.
- Led a team of 5 members, coordinating tasks and ensuring timely delivery of project milestones, using Angular for the frontend and Express.js with MongoDB for the backend.
- Completed project development, with deployment pending.

2024/03 – 2024/03

AI Enhanced Video Subtitles Search Engine

Python, ChromaDB, BERT based transformers, Streamlit

- Analyzed movie subtitle texts using ChromaDB for efficient text vector storage.
- Developed keyword-based and semantic-based search engines with BERT-based transformers.
- Deployed the solution with Streamlit for user-friendly access and interaction.

2024/04 – 2024/04

"Leave No Context Behind"- QA bot

Langchain, Gemini-1.5-pro-latest API, ChromaDB, Streamlit

- Applied Retrieval Augmented Generation (RAG) with Langchain to Gemini-1.5-pro-latest LLM for the "Leave No Context Behind" paper.
- Used ChromaDB for efficient vector storage and deployed the solution with Streamlit for seamless web interaction.
